b) FUTURE OUT LOOK

With the thumping majority win by NDA lead by BJP in Lok Sabha and continuing the formation of NDA Government in Centre, will push back the economy and stability and with positive growth objective, it is expected to have better policy implementation and fast Industrial Growth and development, future outlook is expected to be better.

The domestic economy is expected to steadily improve in the current year on the back of structural reforms and supportive monetary policy. The Government has reiterated its emphasis on infrastructure build-out in the areas of transportation, augmentation of water resources, power, affordable housing and smart cities. Increased private sector participation in the Defence business affords strong business opportunities for entrepreneurs. Various upcoming projects provide the Company with a broad perspective of the opportunity basket opening up in 2021-22.

Pro-investment measures announced by the Indian Government are the key factors to propel the country's economic prospects. The decline in oil prices is likely to support the growth for the Indian

Despite the modest expectations in the short term, the prospects of long term growth in India remain immensely strong. India's growth model is domestic consumption-led. With level of consumption much higher than other Asian tiger (e. g. China) and quite close to developed economies (e. g. Japan), consumption is an important engine of India's growth. Increasing consumption by burgeoning middle-class of India, along with the rising share of discretionary spend, will create a huge market opportunity for companies who have strong position in India.

The Indian economy is likely to continue to outperform its global counterparts in the year ahead. Investment and capacity expansion will be a crucial link in driving the recovery forward; buoyant

domestic demand should help it absorb headwinds from rising interest rates and inflation. With private capex and infrastructure spending like to gather ground, not only will the ongoing recovery sustain into the next financial year but will also translate into greater buoyancy in credit growth and stronger growth prospects for the financial sector in general. Focus on investments in the next fiscal year is likely to render India an attractive market that is well positioned to take advantage of both structural and cyclical gains while its strong domestic base is likely to limit the impact of external stress on growth dynamics and returns. The lower interest rates for housing and taxation benefits for infrastructural projects will boost the demand for finance and all related goods.

The prospects of long-term growth in India remain strong. India brings to the table a rare set of strengths: A long standing tradition of stable democratic governments, capable private sector, huge consumer base and restless entrepreneurs. Given India's demographic transition, the country will still be a relatively young nation 20 years from now. This is likely to generate significant volumes of savings and investment over the coming years. All of the above will create a huge market opportunity for companies who are willing to take long-term bets on the Indian infrastructure.

India remains rich with potential. With a stable government in place coupled with improving business sentiments and a rapidly emerging environment that is conducive for policy making, the future looks promising especially for the Infrastructure sector.

Government has been overall supportive in encouraging pharma and management publication industry in India. Pharma and Publication industry has been included in list of 25 sectors of 'Make in India' initiative of the Government of India. With the right Government policies, we believe that the Indian Pharma and Publication Industry is well poised to benefit from the large opportunity offered in the domestic and export market.

With the outbreak of COVID – 19, though there was slowdown in economic growth, the prospects for pharma industry will be tremendous.

FIXED ASSETS

Tangible Assets

Tangible Assets are stated at cost net of recoverable taxes, trade discounts and rebates and include amounts added on revaluation, less accumulated depreciation and impairment loss, as per AS-28 "Impairment Loss" if any.

The cost of Tangible Assets comprises its purchase price and any cost directly attributable to bringing the asset to its working condition for its intended use. Subsequent expenditures related to an item of Tangible Asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

DEPRECIATION, AMORTISATION AND DEPLETION

Tangible Assets

Depreciation on Fixed Assets is provided to the extent of depreciable amount on the Written down Value (WDV) Method. Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013.

An asset is treated as impaired when the carrying cost of asset exceeds its recoverable value. An impairment loss is charged to the Profit and Loss Statement in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

TAXES ON INCOME

Tax expense comprises of current tax and deferred tax. Current tax is measured at the amount expected to be paid to the tax authorities, using the applicable tax rates. Deferred income tax reflect the current period timing differences between taxable income and accounting income for the period and reversal of timing differences of earlier years/period. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future income will be available except that deferred tax assets, in case there are unabsorbed depreciation or losses, are recognized if there is virtual certainty that sufficient future taxable income will be available to realize the same.

Deferred tax assets and liabilities are measured using the tax rates and tax law that have been enacted or substantively enacted by the Balance Sheet date.

PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Provision is recognized in the accounts when there is a present obligation as a result of past event(s) and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.
